SUMMARY

Aspiring AI & Full-stack developer building responsive AI & web applications with React.js, Flask, and PostgreSQL, with hands-on experience designing AI-powered systems using Lang Chain, RAG pipelines, and vector search. Comfortable across the stack — REST API design, database modelling, cloud deployment, and integrating LLMs into production-style applications.

TECHNICAL SKILLS

Languages: Python, C++, C, SQL

Web & Frameworks: React.js, Flask & FastAPI (Basics), Next.js.

Data & Databases: PostgreSQL, Synthetic Dataset.

Tools & Platforms: Git, GitHub, Vercel, Render, Postman, Canva, Microsoft Office, ChatGPT.

Core Concepts: Object-Oriented Programming, CRUD Operations, Problem Solving.

PROJECTS

EV Data Monitoring — Enterprise EV Fleet Management & Analytics System

Python, FastAPI, MySQL, SQLAlchemy, Scikit-learn, JavaScript, Chart.js | [GitHub](#)

- Developed a full-stack EV fleet management platform with FastAPI, MySQL, JWT, RBAC, telemetry, maintenance, charging, and financial analytics dashboards.
- Built an EV range prediction model using Random Forest and ElasticNet on **10,000 telemetry** records, achieving $R^2 = 0.8369$ with **Random Forest**.

DocuMind Enterprise — AI-Powered Enterprise Knowledge Assistant

Python, React.js, FastAPI, LangChain, RAG, Pinecone | [GitHub](#)

- Built a RAG-based enterprise knowledge assistant for natural-language search across **SOPs, HR policies, and business documents**, processing **50+ PDFs (~3,000–5,000 pages)**.
- Achieved **2–4s query response time** and **~90–95% retrieval accuracy** across **100+ test queries** with vector search, page-level citations, and hallucination guardrails.

StatBot Pro — Autonomous CSV Data Analyst Agent

Python, Streamlit, LangChain, Pandas, NumPy, Matplotlib | [GitHub](#)

- Developed an AI data analyst agent for natural-language CSV/Excel analysis, automating **10+ analytical operations** through dynamically generated Pandas code.
- Implemented automated visualization with **5+ chart types**, achieving **80–85% query accuracy** across **30+ real-world test queries**.

INTERNSHIP EXPERIENCE

Infotac Solution — Data Associate L1, Python Development

Mar – Jun 2025

Teko Spot — Frontend Web Development Intern

July – Dec 2026

EDUCATION

Gnanamani College of Technology B.Tech - Artificial Intelligence & Data Science *Aug 2023 – May 2027*

CGPA: 9.03 | Coursework: Machine Learning, Python Programming, Database Systems, Web Technologies.

The Gugai Higher Secondary School — HSC, Mathematics & Computer Science *Passed Out 2023*

Percentage: 78%

CERTIFICATIONS & ACHIEVEMENTS

- Cloud Computing and Distributed Systems** — NPTEL, 2025 (Elite Grade, 66%)
- Introduction to Industry 4.0 and Industrial IoT** — NPTEL, 2026 (Elite + Silver, 80%)
- Freshers Code War v1.0** — Park College of Engineering & Technology, 2025 (Competitive Coding Certificate).
- Excellence Award – Cody Challenge** | DAKSHAA T26 – K.S. Rangasamy College of Technology
- Typewriting (Senior Grade)** — First Class with Distinction.
